Czechia

PROFILE

I am a 23 y.o. Russian student of Codecademy Full-Stack Engineer Career Path course that is living in Czech Republic. I can build a Node.js server or a React.js front-end with Redux. Next.js is the next very attractive framework that I know how to work with. Furthermore, I am very interested in mobile apps development and I already created multipage amateur level React-Native app.

EXPERIENCE

Field instrumentation engineer I trainee, Doosan Skoda Power — 2018–Present

As a Skoda employee I worked in a big team. My position required me to work with technical documentation, edit different schemas in Autocad and Comos. It also gave me an opportunity to communicate with Skoda's clients. I often assisted in cross-database search of some project data.

EDUCATION

Codecademy Full-Stack Engineer Career Path , Online — No degree, Present

Now I work on my last portfolio project to complete this 6 month course.

West of Bohemia University, Pilsen — Bachelor, 2020

As a Bachelor of Electrical Engineering and Information Technology I studied at Faculty of Electrical Engineering.

West of Bohemia University, Pilsen — No degree, 2017

I completed a 6 month Czech language course with a certificate of completion.

Ural Federal University, Yekaterinburg — No degree, 2017

I studied at Faculty of Thermal Energy for one semester prior to my departure to Czech Republic.

SKILLS
Language skills

Language	Understanding	Writing	Speaking
Russian	Native speaker	Native speaker	Native speaker
Czech	C1	B2	C1
English	B1	B1	B1

Soft skills

I worked in a team of 6 (up to 10) people with additional active communications with other teams. As s foreign student/employee I successfully studied and worked in groups of multicultural representatives such as Africans, Middle-Asians, Russians, Ukrainians, Belarusians, Czechs, Latin-Americans and many others.

Organisation skills

During my Bc I built a small soccer team to fight for a university trophy. I also occupied a position of a manager of sport activities at Ural Federal University: I was responsible for various sport activities for my group (about 20 people)

Computer skills

As a student of Codecademy Full-Stack Engineer Career Path I completely learned PERN stack (PostgreSQL, Express.js, React.js, Node.js). I also worked with Next.js and Password.js. Of course I used recursion functions in my projects. Nodes, linked lists, hash maps and other popular structures and algorithms are well studied by me. Git and GitHub are also became a part of my life.

Furthermore I have an experience with Xcode and Android Studio. Few month ago I worked on a React Native project.

One day I worked with genetic algorithms in Python.
